Identity – Remote Working Personality Report for Staff

Downloads · https://psyasia.com/kb/remote-work-personality-report-staff/

The Remote Working Personality Report for Staff aids employees who work remotely or partly so. It is based on recent studies about the effect of the coronavirus on remote work growth. It helps staff get the most out of working remotely, whilst being more aware of how certain of their personality characteristics may help or hinder this working style.

There is a similar report for managers and leaders who may be working remotely, to help them support their team.
