Do I need particular qualifications to register for the BPS Level 1 & 2 Psychometric Course

Psychometric Assessment at Work Course · https://psyasia.com/kb/do-i-need-particular-qualifications-in-order-to-register-for-the-psychometric-course/

The course is intense, so you will need to be able to attend every day of the course, arrive on time, and be dedicated to completing the homework on time. That will be particularly hard work if you have not been involved in training courses for some time. In terms of educational qualifications we ask that you hopefully have some basic understanding of mathematical concepts (we provide a review of such concepts in the pre-course material) and that you have at least an average level of academic ability and speak and understand English well. Most of our delegates are involved in Human Resources or Consultancy, so generally, the above is not an issue. If you are concerned about this, please contact us for more information.

The main qualification needed is you need to understand that this is a very well-respected international qualification with strict competency requirements. You must demonstrate your competence in the subject matter and this will require passion, work and perseverance. If your main motivation is to collect certificates, you are less likely to succeed. Thank you for your understanding.
