Identity Talent Report

Downloads · https://psyasia.com/kb/identity-talent-report/

This report is based on a test candidate's responses to 'identity' - a fully validated psychometric instrument used to gather information about how the candidate sees himself. These self-perceptions are compared with a professional working population (sample size=1083) to provide a measure of personality in relation to others.

Note: The Identity Talent report was **previously** referred to as the **Comprehensive Report**.
