What is the maximum number of people on each psychometric course?

Psychometric Assessment at Work Course · https://psyasia.com/kb/what-is-the-maximum-number-of-people-on-each-course/

PsyAsia limits the number of places on each course to 10-12. We don't believe in jamming as many people as possible into our courses in order to maximise our profits! Our goal is to maximize your learning experience and time spent with our professionally registered organisational psychologists. It is of course advisable to reserve your place early to avoid disappointment.

Note: Some providers of the BPS Level 1 and 2 training take 20+ people on a course. Our experience shows that 12 is a more conducive maximum for intensive training such as this. We ensure that delegates go away with no questions unanswered and really feel valued on the course!
